

**Matrix Bench**  
Fixed Height Bench

**Rectangular Desk with Secretarial Return**

Rectangular workstations offer a traditional workspace available in several widths and two depth options, 800d & 600d. Optional Secretarial returns, modesty panels and cable trays are compatible with rectangular single and angular desks.

**Double Bench Meeting Extension**

Meeting Extensions are compatible with Double Bench Workstations. There are two widths available when specifying on Double Benches with screens and without screens. The meeting extension is supported by brackets to ensure maximum strength and stability without the use of a visible support leg.

**Double Bench Workstations**

Matrix Double Bench workstations offer clean lines and symmetry with the use of vertical leg frame uprights. Double modules share components reducing the number of legs required. This also increases the movement for the user under the workstations via a recessed shared leg frame between adjoining modules. Optional horizontal and vertical wire management is available and a choice of screen panels.

### Double Bench Workstations

Matrix Bench is available in three paint finishes for the desk metalwork and system screen trim, Silver RAL9006 is standard and White RAL9003 & Black RAL9005 are an optional extra. There are two screen systems compatible with single and double workstations, a full aluminium trim screen and a fabric wrap option with no trim offering a contemporary look. (System Screens are anodised silver as standards not RAL9006 Silver)

Meeting Table

Complimentary conference and meeting tables form part of the Matrix Bench portfolio. The design and detail ensures continuity of aesthetics to complement the Bench workstations with meeting areas and spaces.

Meeting Tables

Optional desk top power & data modules are compatible with meeting tables. The module enables easy access to plug in lap tops, chargers, data cables and other desk top accessories.

A - Flush and discreet fold away access flap.

B - The power module can be elevated when in use and retracted below desk level when not in use.

C - A brushed cable access strip runs the length of the front of the module to accommodate cables.

### Boardroom Meeting Table

The Matrix meeting table provides the ideal centrepiece for the modern and corporate boardroom. Designed using the same framework as the Double Bench Modules enables shared / recessed legs to enhance the appearance and functionality of the table.
