INTRODUCING

# GRAVITY

## Sit Stand Adjustable Desking

UK manufactured premium electric height adjustable desking using world-leading LINAK mechanisms

**NEW - CONTROL YOUR DESK WITH THE MOBILE APP!**

# INVEST IN YOUR EMPLOYEES

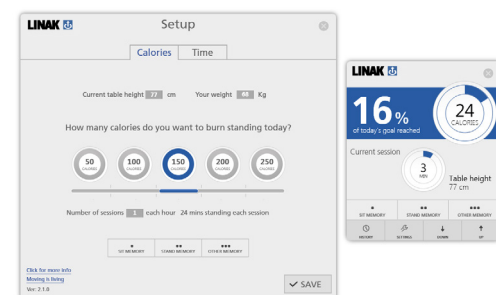

Their health - and productivity - will thank you for it.

We're inactive most of the day. We spend up to 12 hours each day sitting down. This sedentary lifestyle is the 4th leading risk factor for global mortality, causing heart disease, type 2 diabetes and a host of other issues like back pain and poor circulation. We're not claiming we can cure the world's obesity crisis, but it's certainly a step in the right direction.

- **95%** of all back pains start through inactivity. Breaking up your sitting can lower your blood sugar level by up to 30%.
- Employees who use height adjustable desks are **71%** more focused, **66%** more productive and **33%** less stressed.
- Applying physical workplace activity programs have been proven to **reduce sick days by up to 32 percent.**

Double bench options available with central screen (as shown), or individual toolbar screens or simply with no screens at all.

It's hard to remember to stand when you've spent your whole working life on a chair, but with the Desk Control Software you're reminded to stand according to your own personal targets and weight loss goals.

Access to wires has never been so easy with the flip-down cable tray, simply unhook and the tray lowers to provide generous storage.

Store your personal height settings on your phone and control your desk as soon as you walk into your office. Perfect for hot desking when multiple employees are using just one desk.

Keep control of your cables with the Harness system cable riser - simply push the wires in and the harness will hold your wires neatly whether the desktop is high or low.
