

Transparent B-WALL & COURTOISIE 60 protective screen panels

For your protection against the projection of virus in shared spaces !

Effective for optimal protection

Transparent polycarbonate protective screen panels with a minimum height of 60 cm (or 100 cm for B-Wall models) above the worktops to protect yourself and your environment.

Our transparent panels are available in B-Wall version (freestanding) to be placed, 100 cm high (L.60 or 90 cm), ideal dimensions for business and commercial receptions or in a 60 cm high version, to be placed (L.60 or L.100 cm) or to be fixed with clips (L.120 / 140 / 160 cm), height perfectly suited to the uses of protection and separation of workspaces.

Ergonomic and light

Our transparent screen panels are made of polycarbonate, 6 mm thick for better durability, and incorporate radius corners (radius of 30 mm) in the upper part, to avoid any risk of injury in the event of impact or fall.

Transparent and pleasant

Our transparent polycarbonate screen panels (6mm thick) provide you protection and perfect visibility for your clients or colleagues, to keep your workstations bright and pleasant.

Functional and practical

All our screen panels are fitted with cutouts in the lower part, to allow communication and transfer of documents. These ergonomic cutouts allow the passage of cables or the installation of screen support arms.

Simple to clean and disinfect

Transparent polycarbonate panels are easy to maintain and clean, resistant to most surface cleaning products.

Made in France

Our ranges are developed and manufactured in our factory in Honfleur (Normandy, France). Our products are guaranteed for 5 years.

Transparent polycarbonate dividers screens - Technical description

- Transparent polycarbonate screen panels respect a minimum height of 60 cm above the worktops to protect yourself and your environment.
- Transparent polycarbonate, 6 mm thick, recyclable.
- Scratch and impact resistant material.
- Rounded corners in the upper part (radius of 30 mm).

White plexiglass COURTOISIE 60 protective screen panels

For your protection against the projection of virus in shared spaces !

Effective for optimal protection

White translucent plexiglass protective screen panels respect a minimum height of 60 cm above the worktops to protect yourself and your environment.

Ergonomic and light

Our screen panels are made of white translucent plexiglass, 6 mm thick, and incorporate radiated corners (radius of 30 mm) in the upper part, to avoid any risk of injury in the event of impact or fall.

Modular

White translucent plexiglass screen panels (6 mm thick) are available in free-standing version (L 60 or 100 cm, on metal brackets), usable in lateral or frontal use on a worktop (single or shared), or in a fixed version (L 120 / 140 / 160 cm) usable for individual or multi-user stations on all our desks fitted with 25 mm thick tops.

Functional and practical

All our screen panels are fitted with document / hygienic cutouts in the lower part, to allow communication and transfer of documents. These ergonomic cutouts allow the passage of cables or the installation of screen support arms.

Simple to clean and disinfect

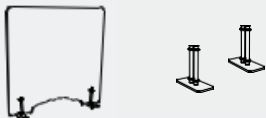

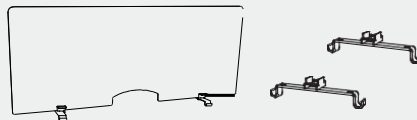

White translucent panels are easy to maintain and clean, resistant to most surface cleaning products.

Stay alert

We can all help control the virus if we all stay alert. This mean you must :

- ↪ Stay at home as much as possible
- ↪ Work from home if you can
- ↪ Limit contact with other people
- ↪ Keep your distance if you go out (2 metres apart where possible)
- ↪ Wash your hands regularly

Do not leave home if you or anyone in your household has symptoms.

**** Price valid until 31/12/2020**

Structurex® COURTOISIE 60 protective screen panels

For your protection against the projection of virus in shared spaces !

Effective for optimal protection

Structurex protective screen panels respect a minimum height of 60 cm above the worktops to protect yourself and your environment.

Ergonomic and robust

Our Structurex screen panels are made of 16mm thick melamine panel and incorporate radiated corners (radius of 30 mm) in the upper part, to avoid any risk of injury in the event of impact or fall.

Modular and colourful

Structurex screen panels are available in 3 dimensions (L 120 / 140 and 160 cm) on Solo metal clips, to be attached to your worktops. Thanks to their 5 plain colours (Limestone, Clay, Granny, Raspberry and White), they will bring variety and protection to your workspaces. These panels are mounted on individual stations as on multi-user stations.

Functional and practical

All our screen panels are fitted with document / hygienic cutouts in the lower part, to allow communication and transfer of documents. These ergonomic cutouts allow the passage of cables or the installation of screen support arms.

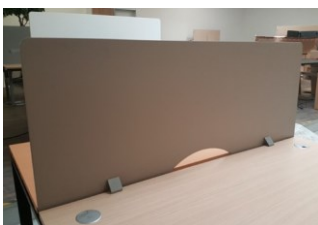

Simple to clean and disinfect

Structurex panels are easy to maintain and clean, resistant to most surface cleaning products.
