

i-sit

DESIGNED BY RALF UMLAND

the designer Ralf Umland.

1959 born Troidorf (Cologne/Bonn)

1987 qualified in Industrial Design at the Bergischen Universität Gesamthochschule Wuppertal.

1988 Product Development Manager, Design and Marketing at Selectra Werk Bank - und Kasseneinrichtungen, Arnsberg.

1993 Project management of Product Development and Design at König + Neurath Büromöbel-Systeme Karben.

1996 Product Development and Design Manager at Viasit Bürositzmöbel, Neunkirchen.

2004 Founded design company, Ralf Umland Design, Product Design and Development.

National and international design awards.

Teaching: Lectures at the Saar Academy of Fine Arts, Saarbrücken and at the Hochschule Coburg, Design Faculty, Integrated Product Design.

From the very beginning Ralf and his team concentrated on successfully blending advanced ergonomic principles with sublime good looks.

No easy task given that their brief also stipulated that the product had to be positioned in an aggressively priced market segment.

Undeterred and drawing upon their vast collective experience they identified a 'basic modular principal' for the chair. The resultant universal frame for the chair back avoids multiple components being needed for the upholstered and mesh designs. This principal has been applied across the range and thanks to the universal frame the entire product group follows a clear design line.

"i-sit is a complete family of seating whose modular concept allows users to select a harmonious configuration to suit their needs."

The ergonomic mechanism at the heart of the chair has been designed with sophisticated synchronous technology that responds to your requirements in the fewest adjustments. It is simple and intuitive to operate and ensures enhanced geometry and total comfort at all times.

"i-sit uniquely combines design and innovation, in an affordable and economic package making it perfect for all markets and organisations."

We are proud of i-sit and grateful to Ralf and his dedicated team for developing a product family in line with our philosophy for the future of seating.

"it was obvious from the start that the product had to be an all-singing, all-dancing, all-rounder"

"it was obvious from the start that the product had to be an all-singing, all-dancing, all-rounder"

Ralf Umland.

ergonomics

i-sit task chairs feature the latest instant adjustment synchronus technology. The modular design allows the easy addition of ergonomically designed arms, headrests and lumbar supports to both mesh and upholstered versions.

Easy to understand icons clearly show the individual function of the controls.

- 1 Maintain a distance between eyes and screen of 500mm to 700mm.
- 2 Keep your shoulders relaxed and not raised.
- 3 Keep your forearms horizontal and elbows bent at an angle slightly in excess of 90°.
- 4 Maintain a distance between knees and desk of 80 to 100mm.
- 5 Avoid pressure to the area behind the knees.
- 6 Keep your legs bent at an angle of between 120° to 90°.
- 7 Keep your feet resting on the floor.
- 8 Let the backrest support your back.
- 9 Adjust the height of the backrest in such a way as to ensure that your pelvis and lumbar region are properly supported.
- 10 Sit firmly against the back with a small gap between the front of the seat pad and the back of your knees.

recyclable content

i-sit can be disassembled for recycling in just 5 minutes

When a recycled material, rather than a raw material is used to make a new product, up to 95.5% of energy can be conserved.

24/7 Use
i-sit seating has been designed and certified for 24/7 use.

Recyclability

i-sit is 95.5% recyclable at the 'End Of Life' and can be disassembled in just 5 minutes.

Raw Materials

i-sit is designed to contain the minimum material contents possible, the task chair weighs only 18kg. The components used are carefully selected in accordance with environmental standards.

Transport

i-sit is light and requires minimal packaging. Due to this the energy required for transportation is reduced.

Production

i-sit is carefully developed to ensure that waste materials, energy consumption and environmental impact are minimised.

Paints

Paints are free of VOC's (Volatile Organic Compounds) and heavy metals.

No CFC's & HFC's

i-sit chair foams are manufactured free of CFC's (Chlorofluorocarbons) and HFC's (Hydrofluorocarbons).

Guarantee

Durable for a long useful life and guaranteed for 5 years 24/7 use.

No Glue

No glues used in the assembly process.

24/7 certified usability certified ergonomic excellence

seating standards

- BS EN 5459-2: 2000+A2:2008** Office seating for use by person weighing upto 150kg and for use upto 24 hours a day.
- BS EN 16139:2013** 4 legged & cantilever seating, strength, durability and safety requirements.
- BS EN 1335-3:2000** Office work chairs safety test methods.
- BS EN 15373:2007 level 2** Seating strength, durability and safety. Requirements for non-domestic seating.
- BS EN 1022:2005** Seating, determination of stability.
- ANSI/BIFMA X5.1-2002** International testing certificate for office chairs. Sections:08,11,13,14,16 and 18.
- TUV Eco-Circle 2008** Tested for recyclable content, harmful substances, energy saving & ergonomic design.

certified company standards

- BS EN ISO 9001:2008** Quality Management Systems.
- BS EN ISO 14001:2004** Environmental Management Systems.
- BS OHSAS 18001:2007** Occupational Health & Safety Management System.
- FISP (Furniture Industry Sustainability Programme Certification)** As part of our Environmental Policy.

awards

- NEOCON** Silver Award Winner 2013 Chicago, USA.

designed for 95% of the population

i-sit's size and adjustability allows it to fit a broader diversity of sizes and shapes than most task chairs. The chair fits the 5th percentile female through to the 95th percentile male, hence accommodating 95% of the adult population.

one chair fits all
i-sit is designed for all body sizes and weights of up to 150kg

Extendable armrests provide wider seating area for larger and wider body frames

i-sit chair at normal operating size with headrest

i-sit chair caters for petite body frames
