## **MATRIX** Fixed and Sit/Sit Height Settable

### **Product Overview**

Matrix range offers various solutions for the workplace and includes single and double benches, managerial workstations, meeting tables, and meeting ends. Shared legs are a feature of the Matrix range, minimising the number of legs required and increasing the useable space for the user, under the workstation. New to the range is a height settable workstation offering height adjustment from 650mm to 850mm. The height is adjusted by unscrewing a single fixing in each leg upright and sliding the lower section of the telescopic leg to the desired height, using the marked height labels. The workstations are complemented by height settable screen panels, allowing the user to determine the height of the screen, irrespective of the workstation height setting.

For an executive, clean appearance, optional horizontal cable trays and vertical cable risers ensure cables are routed within the workstation, from the entry point of the leg to the underside of the desk. In addition, a high capacity, horizontal cable tray is available for the double bench workstations, for multiple cable requirements. A full range of accessories are compatible including monitor arms, CPU holders, desktop electrics and desk mounted screens, enabling workspace to be private and defined.
