Ligni™

Slim, stylish and elegant – yet also exceptionally strong
Ligni features shaped and radiused ply legs that bring out the distinctive character of this environmentally-friendly material.

The sides of the legs are faced in any of a wide choice of veneers and laminates: in combination with the extensive choice of top and edge finishes, this provides the designer and specifier with an exceptional palette of colours, patterns and textures.

Ligni workstations, bench desks, meeting and coffee tables with tops in MFC or veneer, featuring an elegant thin profile and edges either to match, or contrasting in Black, White or ply. Discreet cable management options unobtrusively cater for today's technology. Fully upholstered PAD screens provide privacy and division while maintaining collaborative openness.

Matching Ligni chairs, stools, bench seats and storage round out a comprehensive range with shared design elements.

Ligni furniture finished in 3D Natural Halifax Oak and PerfectSense Dust Grey, teamed with Clarity sofa and coffee table featuring ply feet.
