BEWALL

Acoustic fabric screens

The range of BeWall acoustic fabric dividers allows each user to form a boundary and bring a certain degree of confidentiality necessary to concentrate on work and optimise comfort.

The **BeWall** dividers represent an elegant solution to structure your work spaces while reducing noise and providing a decorative touch with their fabric finishes and stylish attachment clips. The 30 cm high Plexiglas extensions allow the light to come through while providing users with extra protection. They can be easily attached to the top part of the fabric screens.

Clamps for fiting BeWall screens on single desks or multi-workstations.

Fixed front screen and topper

Fixed return screens

TECHNICAL DESCRIPTION

- Office screens with acoustic fabric finish, 25 mm thick, need to be fixed by clamps onto worktops (25 mm thick).
- The screen panel is composed by a 19 mm thick Structurex® melamine-coated structure with rounded corners (radius 30 mm), covered with sound-absorbing melamine foam and 100% Trevira CS fabric, M1 fire resistance panel.
- 4 sizes of fabric front dividers : L 120 / L 140 / L 160 / L 180. Each is 40 cm high and clamped on worktops.
- 2 dimensions of return dividers : D 70 / D 80 cm. Each is 40 cm high.
- 3 choices of metal fixing clamps available in 3 different colours to match our desk frames. BeWall Screens will fit on single desks and multiworkstations (fixed or sliding).
- Screens covered in Step Mélange fabric, 100% Trevira CS M1 fire resistance panel.
- 30 cm high screen toppers in transparent 6 mm thick plexiglass with rounded corners and integrated grippers, perfectly suited for positioning on top of our fabric screens. Total height of fabric screen and screen topper : 70 cm.
