Office furniture

receptiv

Receptiv offers a full compliment of reception furniture, consisting of modular base and top units, supplied in various sizes and finishes with accessories such as paper storage, CD racks and key lockers as well as integrated pedestals. Low-level glass shelves on steel supports offer a more open and inviting approach to the desk. Specific modules allowing for wheelchair access, accommodating the DDA requirements are also available.

Space is money as property and letting has risen to new heights in recent times; and so has the demand for more compact receptions. With technology having advanced and most offices already using space saving flat screen monitors, there is no real need for very deep desking space and therefore Receptiv is the solution - with 600mm deep units to accommodate today's needs without losing any of Receptiv's appeal.

A cable management facility is incorporated into desktops and panel legs with the use of cable ports. Cable trays are also available as an additional option. All these options will introduce flair, variety, flexibility and not to mention practicality to any office environment.

Receptiv in a semicircular layout for a dramatic impact in Santiago Cherry wood finish, bringing a contemporary warm feel to any reception environment. Executive glass shelves that can be aligned to create a continuous flow with brushed stainless steel shelf supports complement its overall appeal and flair.

An optional kick plate with a brushed stainless steel finish not only protects the unit but also enhances its overall aesthetics.

Perfect to fit into the corner of a reception room. This configuration displays style as well as an extremely user-friendly working space and includes our new desk height pedestal that has taken on the appearance of the Receptiv front.

Bright colours promote a positive working environment.

Glass counter tops are the latest addition to the Receptiv range.

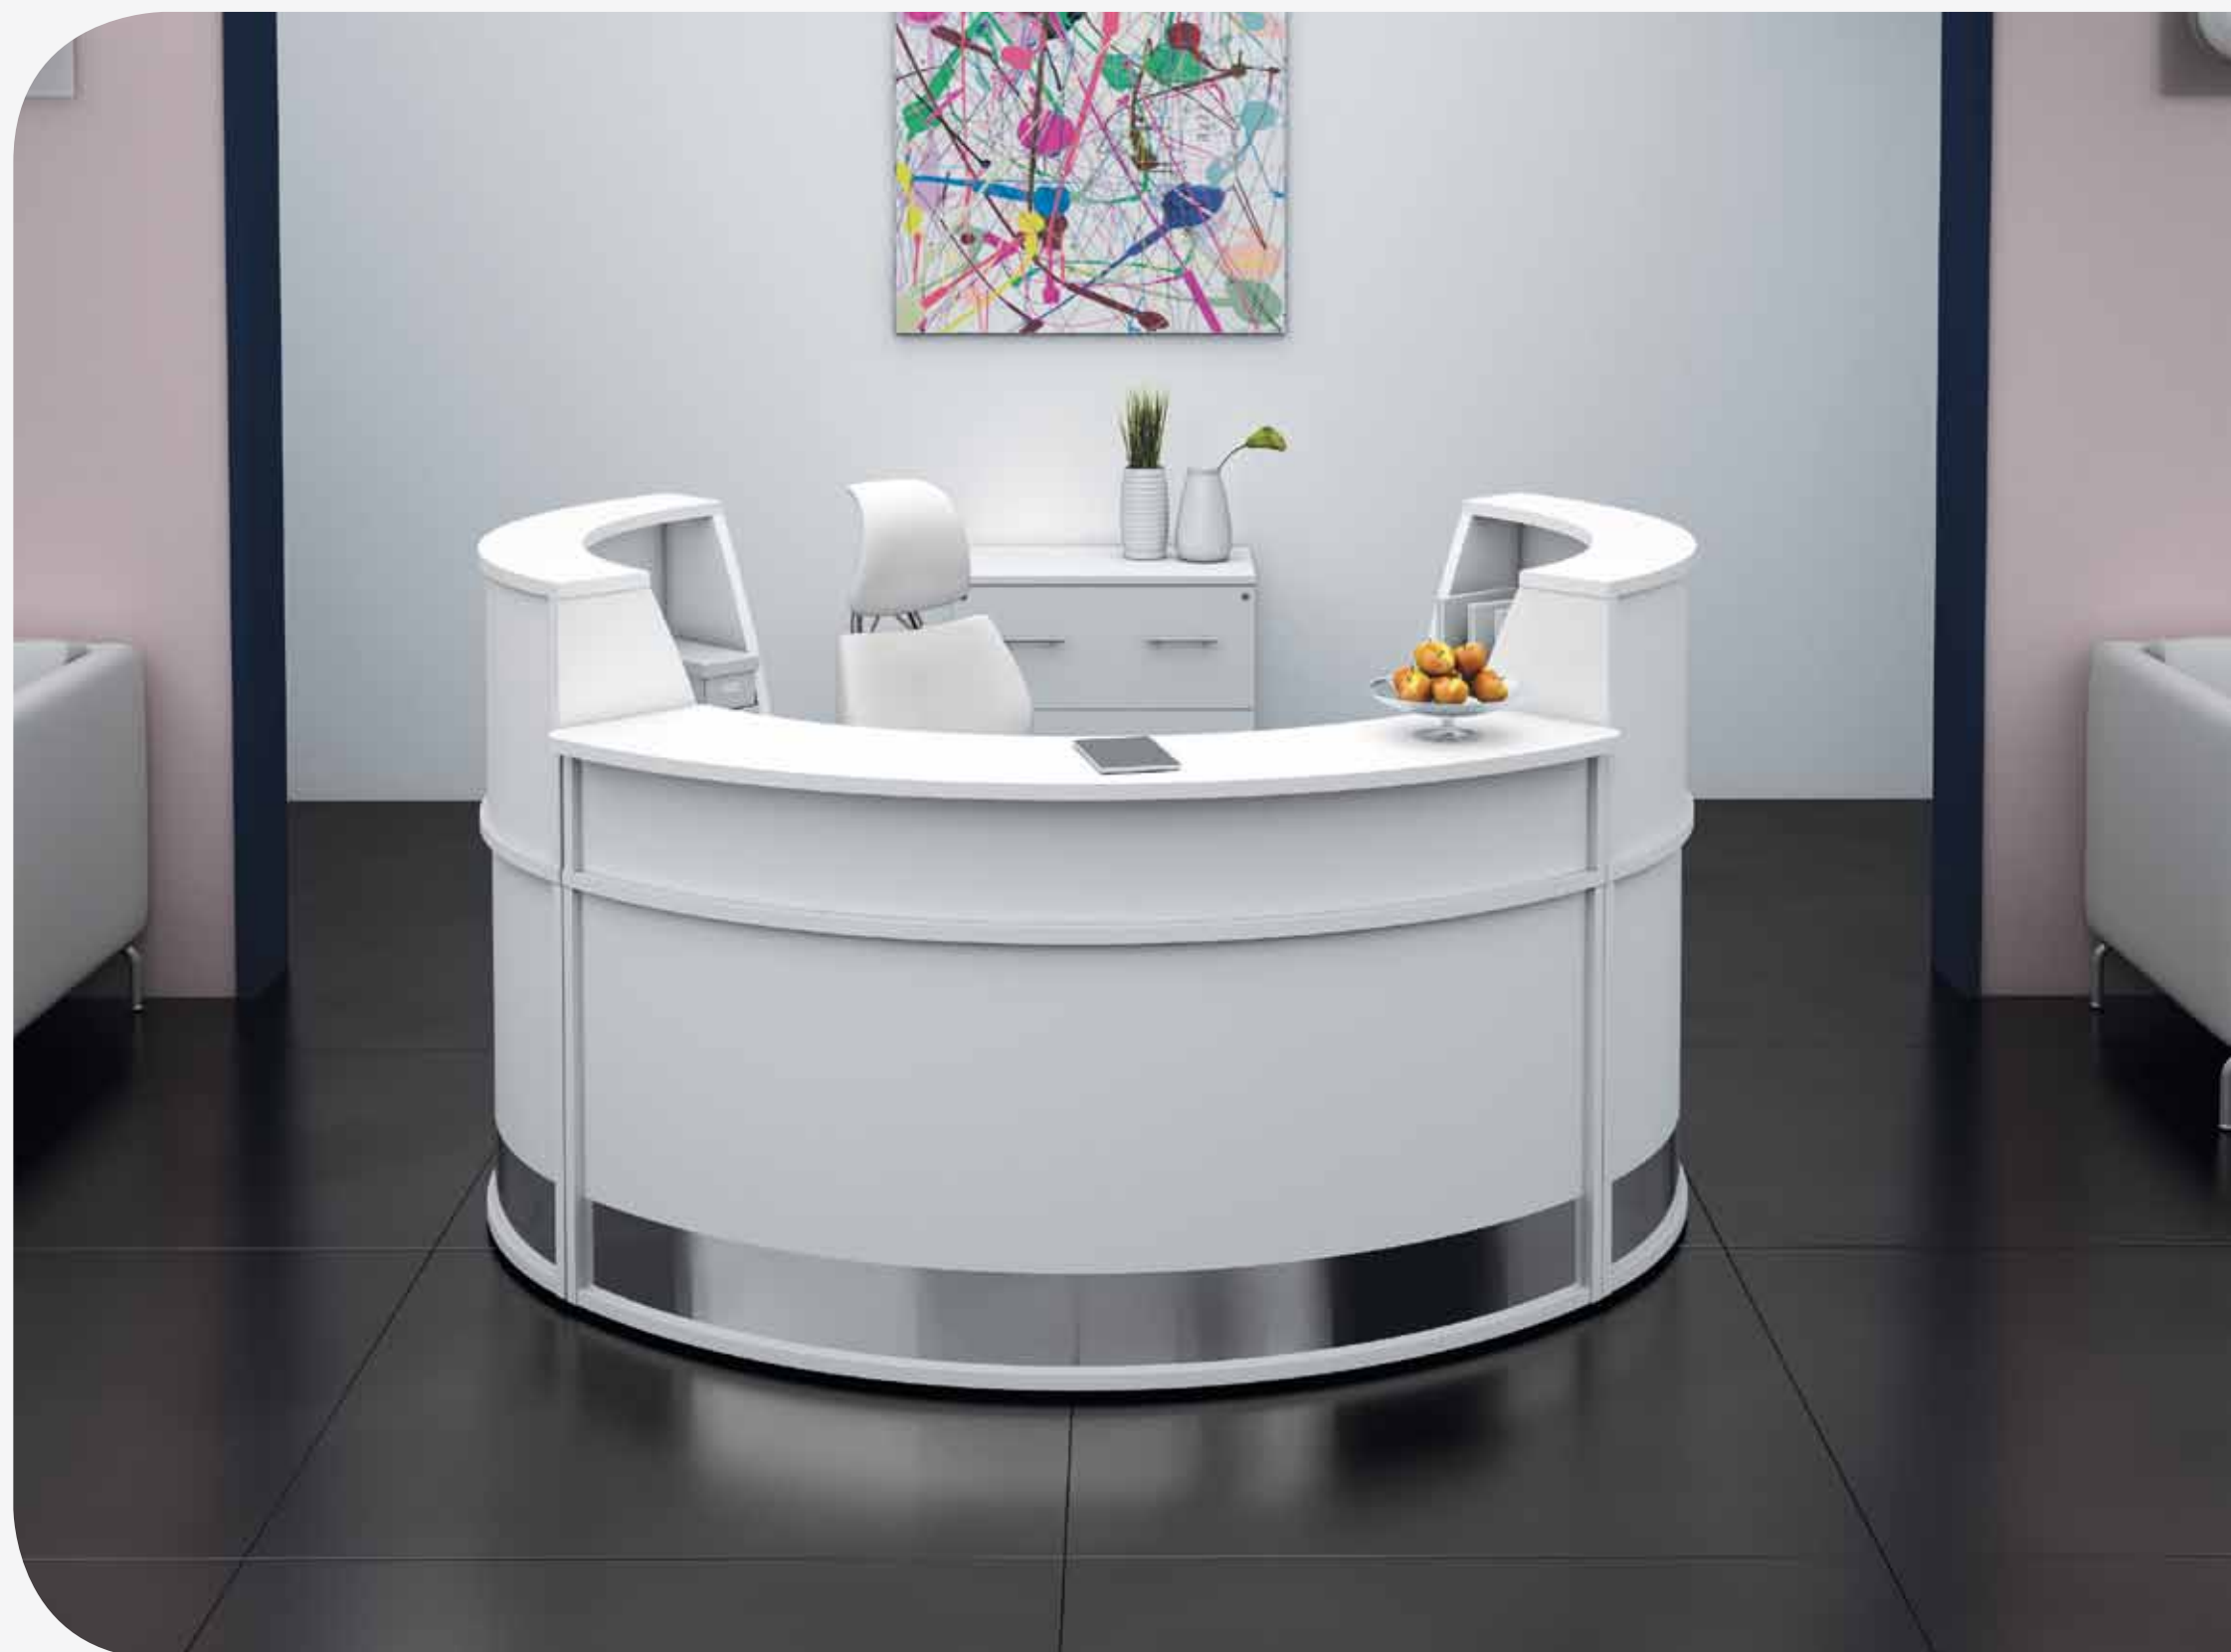

Traditional receptions can be further enhanced with the use of new modern colours. Base unit cupboards and pigeon hole units create additional storage.

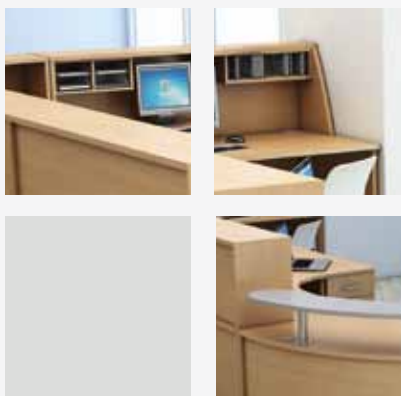

Crisp, fresh and modern is its first impression. Ideal for hair salons, beauticians, opticians, dental surgeries and travel agents. The new 600mm deep base units give us the opportunity to provide far more compact and space saving reception layouts and by using the shallow top unit as a shelf, this configuration offers good sight lines as well as hiding unsightly items.

Contrasting colours provide a modern aesthetic appeal with the introduction of the new Anthracite board finish.

Another creative configuration, using beech and contrasting silver shelving. Recessed radius counter tops allow desk space to be used to its maximum. The addition of paper storage trays, CD racks and a shelving unit allow the user to maintain an effective and professional working environment.

The use of kick plates not only protects the unit from damage but also complements its aesthetic appeal.

The main image is traditional in style with the walnut finish and silver kick plate, displaying a classical luxurious glass shelf, as well as a radius base unit that allows wheel chair access. A mobile storage unit is neatly tucked under the base unit. Waved top units enhance the overall aesthetics. The inset shot shows a simple segment base unit with the new desk height pedestals and top units making it a unique compact reception alternative.

A range of reception tables to complement the Receptiv range is available in two styles - either MFC or Glass tops with tapered legs.

These floor plans relate to the specific images shown in this brochure and provide you with overall dimensions to assist you in your space planning. However please be aware that there are endless other options available and therefore we offer an efficient CAD service to achieve the best results for you.
