Power and data requirements available

Fully webbed seat

📏 30kg
SKY2/RB
other weights on application

♻️ Min 95% recyclable

Skyline

Designed by Henry Gurney

Skyline has been designed and developed to provide an intelligent planning solution for all environments. Recognising that we work in predominantly rectangular spaces, Henry drew his inspiration from the visionary design of New York City's grid plan city blocks. The use of squares and rectangles allows you to build your own configuration from the 23 different modular units. Ideal in small or large arrangements, Skyline is perfect for corporate breakout and reception areas as well as more robust educational environments.
